Address: Washington State University
Head of Science Libraries
Owen S&E Library
Pullman, WA 99164-3200

Objective: Maintain and expand a fully searchable Internet database of published and unpublished findings from scientific research carried out in Yellowstone National Park.

Findings: Database available at: www.wsulibs.wsu.edu/yellowstone/. Ongoing project; currently ca. 9,800 unique entries. The web site is linked from the Yellowstone National Park homepage. I am working with the Yellowstone Center for Resources and the National Park Service Natural Resources Bibliography project to provide as complete coverage as possible. Most entries have abstracts; all have assigned subject headings.
